

ECONOMIC BULLETIN on INPUT COSTS Up to April/May 2022

Food and drink producer prices, consumer prices and inflation

- In May 2022, EU food and drink producer prices increased by 17.8% compared to May 2021.
- Consumer food prices registered a 10.3% increase since May 2021.
- Inflation was up by 8.8% in May 2022 year-on-year.

[Click here for more information](#)

Energy prices

Crude oil and natural gas

- In May 2022, crude oil prices increased by 67% compared to May 2021.
- EU natural gas prices rose by 235% since May 2021, while US prices have increased by 182%.

[Click here for more information](#)

Transport costs

Global shipping and air freight

- The global container freight rate index increased by 53% between May 2021 and May 2022. Following a peak in September 2021, the index declined by 23% in May 2022 compared to September 2021.
- Air freight rates were up 39% compared to May 2021.

Packaging

Wood and paper

- April year-on-year, producer prices index of wooden containers grew by 44%.
- Producer price indices of pulp and paper have continuously increased in 2021 and registered a 38% rise compared to April 2021.

Plastics and metal

- The producer price index of plastic packing goods grew by 17% since April 2021.
- The April year-on-year comparison shows that the producer price index of light metal packaging grew by 24%.

[Click here for more information](#)

Machinery for processing

- The producer price index of machinery for food and drink processing registered an 8% increase since April 2021.

[Click here for more information](#)

Labour

Labour shortage

- The job vacancy rate in the EU manufacturing industry has risen significantly since Q1 2021 (Q1 2022/Q1 2021: +60%).
- In Q1 2022, the job vacancy rate in the manufacturing industry varied across Member States, from 5.7% in the Czech Republic to 0.4% in Greece.

[Click here for more information](#)

Agricultural raw materials

- The FAO food price index increased by 23% in May 2022 year-on-year.
- For further details, please see the European Commission's monthly [commodity price dashboard](#).

Animal feed

- Producer prices of animal feed have continuously increased since August 2020.
- The April year-on-year comparison shows that the producer price index of animal feed grew by 29%.

[Click here for more information](#)

Fertilizers

- Most fertiliser prices soared in 2021, particularly those for phosphates and urea.
- In May year-on-year, prices of diammonium phosphate, triple superphosphate and urea increased by 47%, 57% and 113% respectively.

[Click here for more information](#)

Methodology

- **EU refers to EU27 (excluding the UK)** in the text, unless otherwise specified.
- The EU food and drink industry is identified by NACE Rev.2 codes C10 (manufacture of food products) and C11 (manufacture of beverages).

Note on

- **Producer Prices Index (PPI)**

The PPI for a specific economic activity measures the monthly change in the trading price of products and related services. The PPI is an output index - it measures price changes from the seller's perspective. The prices collected in period t should refer to orders booked during period t (at the moment of the order) and not the moment when the commodities leave the factory gates.

- **Job vacancy**

A job vacancy is defined as a paid post that is newly created, unoccupied, or about to become vacant:

- for which the employer is taking active steps and is prepared to take further steps to find a suitable candidate from outside the enterprise concerned; and
- which the employer intends to fill either immediately or within a specific period of time.

Job vacancy represents the unmet demand for labour.

Transport costs

Source: *Freightos, global container freight rate index, [cited by MacroMicro](#)*

Supplementary notes:

FBX stands for Freightos Baltic Index. The index represents a market rate for freight for any given shipping lane for a 40' container. The index is based on aggregated and anonymized real-time business data from global freight carriers, freight forwarders, and shippers that use the WebCargo by [Freightos](#) freight rate management platform. The values are an average of the five business days of the last full week in each month. The values are a monthly average of weekly prices.

Air freight index

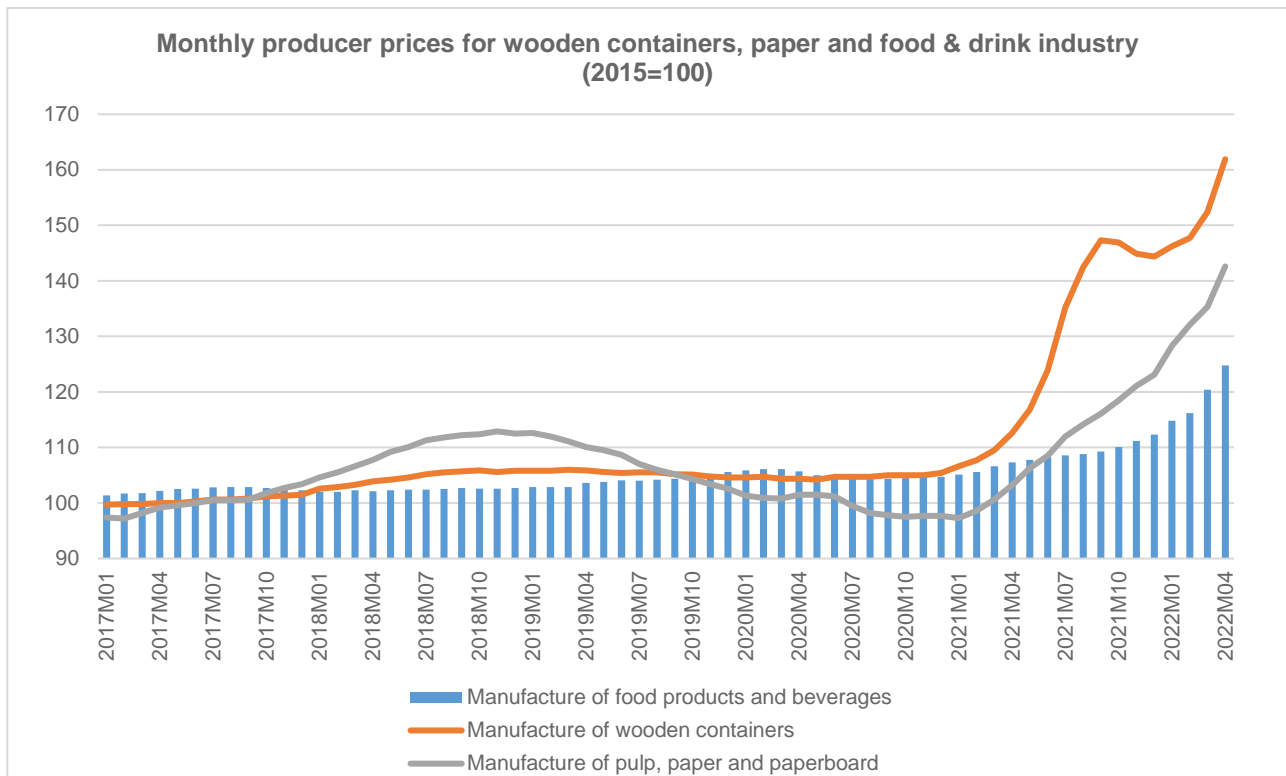

Source: [Baltic airfreight index](#)

The Baltic Exchange Airfreight Index (BAI) – powered by TAC data – reflects the price per kilogram of general cargo flown on 17 key trade lanes, from origin airport to destination region. The Baltic Air Freight Indices (BAI) reflect weekly transactional rates for general cargo as provided by freight forwarders. The data includes a headline index - the BAI Index – a weighted average of the 17 underlying destination basket routes, as well as six outbound indices – a weighted average of the destination baskets from each of the six origin airports.

Notes:

Changes in world prices are based on prices expressed in USD.

1) EU cereal quotations: soft wheat and barley (delivered Rouen), durum wheat (Port-La-Nouvelle/La Palice) and maize (Bordeaux).

2-3) US Soft Red Winter Wheat and US Hard Red Winter Wheat.

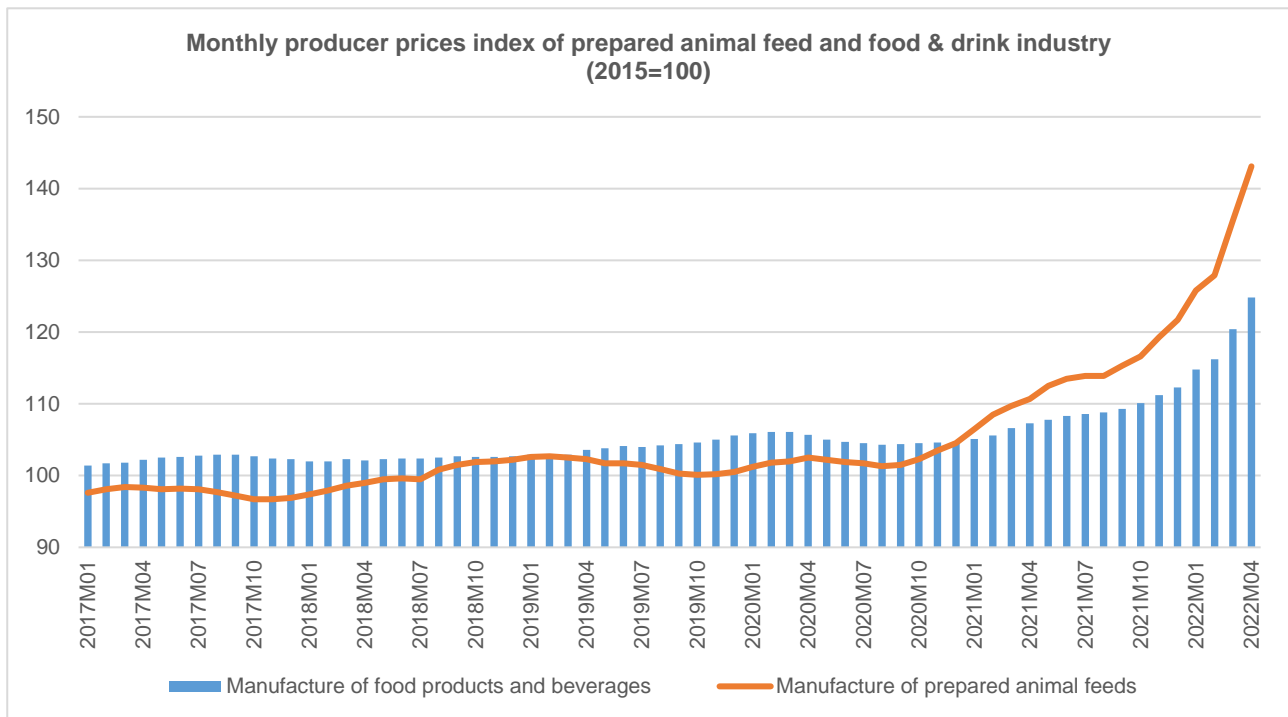

4) Figures for previous month.

5) Preliminary price.

6) World pork price is represented by US, as it is the biggest world exporter after the EU.
